Study Plan DCPL47 - Jazz Trumpet, Bachelor

General goals
The Saint Louis wind instruments section is a European excellence for saxophonists, trumpeters and trombonists from all over Europe. The teaching staff includes memorable artists such as Maurizio Giammarco, Rosario Giuliani, Michel Audisso, Javier Girotto, Mario Caporilli, Claudio Corvini, Davide Di Pasquale and Mauro Massei.

During the Bachelor of Arts, the characteristics of one's personal style in jazz, tradition, be-bop and contemporary jazz are developed to the highest possible level; this includes an advanced technique, creativity, rhythmic sense, improvisation language, comping and a Jazz, Jazz-blues, Fusion and Latin style soloing.

Instrumental enhancement is achieved through the technical and practical use of diminished, whole tone, lydian b7, altered and bebop scales, with arpeggios on seventh accords of harmonic and melodic minor scales, with extensions of chords up to ninth, diminished and altered chords. The construction of one's own personal sound passes through the conscious use of harmonics, alternative positions, high tones positions, sub tones, multiple sounds, growls, and slaps.

Jazz improvisation faces complex pieces of the modern repertoire, Coltrane changes, modal improvisation, in and out, polytonal, free.

The jazz saxophone, trumpet, and trombone lessons are individual and allow the student to personalize its own repertoire, track its own learning time, and go beyond the boundaries of the educational program by exploring the new generations of international wind instrumentalists.

The study of contemporary Jazz harmony and modal harmony and arrangement techniques for rhythmic section and woodwinds are completed and deepened. Particular care will be devoted to digital pre-production, with sequencing and virtual instruments, and in the production of orchestral scores for recording sessions with "real" musicians.

Much space is reserved for wind instrumentalists who have the opportunity to attend up to 3 ensembles every year, one or more orchestras, a combo and the Saint Louis Big Band, directed by Antonio Solimene, Maurizio Giammarco, Paolo Damiani, Gianni Oddi and starting from 2017 also by Vince Mendoza and Richard De Rosa.

Each graduate will master all the major music software used by musicians and producers of the contemporary music industry.

In the last year of the course, each student will be able to develop his own original artistic project, record it under the guidance of an artistic director and publish it with the Saint Louis discography series: the Jazz Collection.

• Seventh chords: in a fundamental and facing position and in a narrow and lateral position
• “Harmonic bond” technique for connecting chords
• Construction of the seventh chords on the major scale degrees
• Construction of seventh chords on the degrees of harmonic and melodic minor scales
• Functional prerogatives of chords in tonal music
• Harmonic cadences
• Major scale modes
• Chord-mode relationship of the major scale: extensions compatible with the various chords and avoid notes (extensions not compatible or rarely used)
• Harmonic substitutions: diatonic (with chords deriving from the same scale); of tritone
• Secondary dominants and relative “tritone substitution”
• Modulation: direct and with mutual chords
• The secondary dominants and the extensions compatible with the relative chords.
• The tritone substitutions applied to the secondary dominants
• “Turn Around” in major and minor key and processing capacity of the same on the basis of the techniques previously exposed (secondary dominants and tritone substitution)
• Melody harmonization techniques based on acronyms and given theme (4 parts total)
• Chords extended to 9th, 11th or 13th with 4 voices in fundamental position

• Harmonic and melodic minor scale modes (construction techniques)
• Harmonic analysis in major and minor key

Prove di Ear Training
Ear Training Test

For this test, it is necessary to have an electronic device to download the track, as well as headphones to listen to it, along with a sheet of paper, a pencil, and an eraser.

3a) WRITTEN TEST - Dictation
1. Melodic dictation: 8-beat melodies with modulations to close tones or short melodic fragments (lick) in classic and modern style (major and minor pentatonic, blues scale and modes) in all keys
2. Modal dictation: All the modes of the major scale - the octophonic scale (ST and TS) and hexatonal
3. Rhythmic dictation: figures taken from the text D. Agostini, "Solfeggi sincopati Vol.I"
4. Harmonic Dictation: Major, minor, augmented and diminished triads; Sus4, sus2 and b5 triads; Triads with added note: Major add2 and add9, Minor add2, add4 and add9
Triads inversions on given note, Seventh chords of I - II - III and IV species, inversions of seventh chords of I - II - III and IV species on given note. All other seventh chords built on major, harmonic and melodic minor degrees
5. Dictation of harmonic functions with lead voice and bass:
Short harmonic sequences (4-8 bars) built on the most common harmonic turns with seventh chords also with the use of inversions (in various major and minor tones). Three lines will be used for this writing: First line for Lead voice / Second line for the slash and rhythmic notation with the acronyms of the chords / Third line for the basses

Second Major and minor; Major and minor third (avoid the term augmented second); Perfect and Augmented Fourth (for the augmented fourth and the diminished fifth the word tritone will be used since it is impossible to discriminate the harmony); Perfect fifth
Major and minor sixth (the term minor sixth, in this phase, will be preferable to the harmony of augmented fifth because, lacking the discriminating intermediate sound, the interval will sound as an imperfect consonance and not as a dissonance); Major and minor seventh (avoid the term augmented sixth); Perfect octave, major and minor ninth. Major and minor tenth. Perfect and augmented eleventh, perfect twelfth, major and minor thirteenth

SMALL JAZZ ENSEMBLE

Learning outcomes

Syllabus

The Small Ensembles are conducted in small groups of students under the guidance of a teacher, acting as both an artistic director and a musician member of the band. The aim of the ensemble is performance, with high standards drawn from the traditional jazz repertoire as well as original pieces, original arrangements, and space for improvisation and interplay. The groups will perform throughout the year, showcasing their own repertoire at events organized by Saint Louis in major clubs and festivals in Rome. Moreover, the best projects will be further promoted for professional engagements in live clubs, festivals, and showcases in Italy.

Bibliography
Per i corsi di musica d'insieme non esiste una bibliografia specifica.

Exam

The student is evaluated based on live performances and according to the educational (and "musical growth") path undertaken throughout the year.

Campo disciplinare : Armonia jazz - Area: Discipline compositive
Settore artistico-disciplinare: Composizione Jazz codice CODC/04

JAZZ HARMONY I

Learning outcomes
The principal aim of the course is the gradual growth and development of the student's knowledge of the voicing structure (polychords, upper structure and quartal voicings), and the internal motion of the parts, with specific attention to the harmony used in modal and contemporary jazz. Special relevance will be the analysis of some significant harmonic progressions, such as the "jazzy blues" and the "Coltrane changes". A course section is dedicated to the "block harmony", with the aim of equipping the student the first useful tools for the composition of harmonized melodic lines to be used, for example, in an "orchestrated section" setting.

Syllabus

1. Refresh of the main topics of the previous course.
2. Reharmonization (1).
3. Polychords and upper structure.
4. Inversions of extended chords: rules for the parts arrangement.
5. Melodic motion in the inner part of the chords.
6. Quartal voicings of three to six parts.
7. Multifunctional aspect of the pentatonic scales: adaptation and connection with chords and complex harmonic sequences.
8. Third interval connection and "Coltrane Changes"
9. Comparison of different types of jazz blues: distinctive traits of Parker and Coltrane.
10. Melodic analysis, harmonization techniques and voicings connected to the "block harmony".

SECTION RELATING TO THE BLOCK HARMONY
• Melodic analysis according to the block harmony: passing tone, approach notes (diatonic and chromatic), tensions, double chromatic, indirect resolution, tensions that resolutes on a degree, top note independent;
• Melodic anticipation and delay;
• Low interval limit in the lower register;
• "Block" harmonization techniques of the melody according to the melodic categories: diatonic with the diminished chord, dominant, corresponding;
• Four parts harmonization with double lead part (lower octave): close parts, drop 2, drop 3, drop 2-4.
• Substitution of internal parts of the chords;
• Five parts voicing by substituting the double melody;
• Four, five, six spread voicings total for the creation of backgrounds;
• Quartal voicings with three, four and five parts;
• Cluster voicings with three, four and five parts;
• Voicing with upper structures with three (extracted triads technique), four, five and six parts.

PROFESSIONAL JAZZ ENSEMBLE

Learning outcomes
Ensembles are held in small bands of students which are led by teachers, who are art directors and band musicians at the same time.
The aim of the ensembles is the performance, which includes complex songs taken from the pop repertoire and original songs, with arrangements, interplay and improvisation opportunities.
The bands will play gigs during the academic year with own repertoire and during the events organized by the Saint Louis in the renowned music clubs and festivals of Rome. The best projects will be promoted for professional concerts in live clubs, festivals and events throughout Italy.

Syllabus
The contents of the course (repertoire) vary according to the stylistic and thematic subject of the ensemble. An aspect which is handled crosswise in all the ensembles, is the development of the interaction capacity within the band, which deals with all the possible issues resulting from a shared study of a repertoire, with particular attention to its own role within the band.

Bibliography
Per i corsi di musica d'insieme non esiste una bibliografia specifica.

Exam
Evaluation of the live performance and of the entire learning path (musical growth) during the academic year.

JAZZ IMPROVISATION I

Learning outcomes

The principal aim of the course is to equip the student with all the tools necessary to develop the creative potentials and to cultivate the awareness and the understanding of the mechanisms that control tensions and resolution in music. The final aim is to increase the ability to create an improvised phrasing as an expression of thoughts and emotions. A lot of relevance is given to the study of the theme improvisation as a starting point for a solo and for the thought of “improvisation” as a “variation” of an existing theme.

Syllabus

- Study of the connections between the key's degrees applied to the practical improvisation on the main harmonic progressions: V-I; IV-V-I; II-V-I; I-VI-II-V;
- Study of the chromatic and diatonic approaches on the notes of the arpeggios and the introduction of chromatic elements within scales (bebop scales);
- Study and analysis of simple patterns in order to understand the phrasing methods;
- Study of the pronunciation and of the accents, to create phrasing expression without ignoring rhythmic ideas;
- Study of the traditional blues built on 3 chords (for example “Blue Monk”);
- Study of the blues with simple harmonic substitutions: “Billie's Bounce” or so called “Blues Bebop”;
- Study of the minor blues: “Mr PC”, “Equinox”;
- Solo Analysis of the “great jazz musicians” (for example C. Parker, D. Gordon, D. Gillespie, B. Powell, T. Monk, etc.);
- Study of some dominant chord types with relative scales.

3) Execution of one blues to be chosen by the student without modulation

JAZZ TRUMPET I

Learning outcomes

During the three years of the Jazz Trumpet course, the study will focus on the technique and the improvisation. The study of the technique will be divided into five areas, each supported by specific methods, that will help the student to master a study methodology to approach the trumpeter's musician profession with the right basic training.

Syllabus

TECHNIQUE

Warm up, flexibility, development of the position technique. Used methods: Clarke and Colin.

- Classical studies taken from Sigmund Hering's method.
- Particular attention will be paid to the development of the sound and the intonation, and to the specific instrumental techniques: pronunciation, accents, syncope, flip, smear, shake, glissando, vibrato etc. through the handouts provided by the teacher.
- Study of the jazz language and sight reading of big band scores with the support of Piana-Brusco's method: Blow The Trumpets Vol. 1
- Control of the instrument's position and study of the embouchure.

IMPROVISATION

- Study of the major scales and modes built on it in twelve keys: dorian, phrygian, lydian, mixolydian, aeolian, locrian. Study of the pentatonic scale and the blues scales in all 12 keys.
- Study of patterns using the Oliver Nelson Patterns' method for the improvisation.

Patterns processing created by the student and patterns transcribed from recordings.

- Study of bebop phrases with the support of David Baker's method: How To Play Bebop 1.
- Study of the jazz repertoire with Aebersold's method and all the Real Books, which allow the application of the previous studies.

ADVANCED EAR TRAINING

Learning outcomes
The purpose of this course is to help the student to hear the chords from other harmonic systems. Through a method that goes hand to hand with the knowledge of jazz harmonic, the student will learn how to recognize secondary dominants, tritone substitutions (with) and modal interchange. The course, which will be more and more articulated, will reach its peak through the transcription (without the usage of the instrument) of "short songs" played on the piano and dictated on three staves: melody, chords with slash and rhythmic notation, bass line.
Other complex transcriptions are requested to be done at home with the assistance of one's instrument which will be verified during the lesson. The final work will be handed in as a PDF file within the end of the academic year. Also, studying modern and classical (choir form) sight reading will be part of the course.

Syllabus
● Modal dictation: all the modes of all the minor scales;
● Harmonic dictation: seventh chords originating from other keys, tritone substitution, modal interchange;
● Short-song dictation played on the piano: small compositions (max. 16 bars) built on the most common harmonic turnarounds with the use of inversions (various major and minor keys). Three staves for the dictation:
– First stave for the melody;
– Second stave for the slash and rhythmic notation with chord symbols;
– Third stave for the bass line;

● Transcription of songs from the Italian and international pop, funk, fusion etc. repertoire with triads and seventh chords with extensions. Mandatory use of slash and rhythmic notation with chord symbols. The transcription must be completed at home using one's own instrument and be transcribed with the notation software FINALE. It will be necessary to transcribe the melody, the drum section and the bass line as well.

Bibliography

Exam
Practical and written verification assessment of the course's program.
The work done at home must be handed in during the previous lesson and it will be given a mark. This mark will be included in the average of the final mark. The final assessment must be handed in as paper and digital form (.PDF - .MUS).

JAZZ HISTORY AND AESTHETICS 1

Learning outcomes

Reconstructing the "generative" music of jazz and the path of this music (of Afro-American origin) in American society and, over time, its diffusion in Europe and Italy. This will be analyzed and illustrated in a parallel process, with comprehensive references to Italian jazz. Examine the various scenarios and styles of jazz, from its origins to the 1950s included.
Focusing on the music and cultural components, the characteristics of styles and languages. The main artists.
The story always starts from the "sound text" (with listening and visions on which the didactic path hinges) to arrive at the socio-economic "context". Enhance the analysis of the sound document. In addition to listening-visions, the use of concept maps and images is envisaged to better establish concepts and dynamics.
